- Presence of Ethical Committee to assess and give clearances
- Feasibility for a start up to get associated at any stage of development - Idea stage, POC stage and Trial stage
- Helping the start ups to get an industrial partner

### **Director - Waste2Watts India Pvt Ltd**

- It is an Environmental Healthcare Start up involved in Recycling waste materials into new materials and objects, thereby reducing: energy usage, air pollution (from incineration), and water pollution (from land filling).
- Land filling can cause toxins in waste pollute land, groundwater, waterways and attract rodents and dogs, all the of the above posing immense danger to humans.
- Organic waste in landfill also releases greenhouse gas that contributes to global

warming.

- Villages close to landfill pay the cost for population increase and waste increase in cities

**The main products are:**

- Biogas=combustible gas mixture of methane, carbon dioxide and small amounts of other gases and trace elements
- Digestate = decomposed substrate, rich in macro and micro nutrients used as agricultural fertilizer.

**Director - Forent Technologies**

- The parent company of AtrialRhythm, makers of **Connect Health Care Suite**, a cloud based healthcare communication platform where patients and healthcare providers connect and communicate with each other seamlessly.Suits are:

**Connect One Plus:**

- Manage appointments
- Manage and connect with patients
- Emergency Page
- Instant messaging

**Connect One:**

- Manage your health
- Request and manage appointments
- Instantly connect with healthcare providers
- Wait times Notification

Version 1 of the product will focus on the Outpatient Consultation and Follow Up cycle.This will help enable improved response time, better patient care and effective Practice Management.

Version 2 will have wearable, IOT etc.,

**Director - Tvasta Bio-Science Pvt Limited**

- It is a company involved in the making of an Indigenous 3D Bio printer
- This will be a Make in India project and the cost of the printer and also that of the printed body parts will be reduced substantially
- In the first phase will be ENT products and eventually the company hopes to replace animals for testing and drug testing
- The company will also be getting involved eventually in patient specific devices and implants

**Director - Dhanva Healthcare Cluster**

- It is a company which will help individuals and start ups to get funding
- Help them in locating appropriate incubation centers
- Help them with partnering with appropriate industrial partners

- Help them in getting funding for taking their products to the market
